

Creating a GitHub Account

Objective

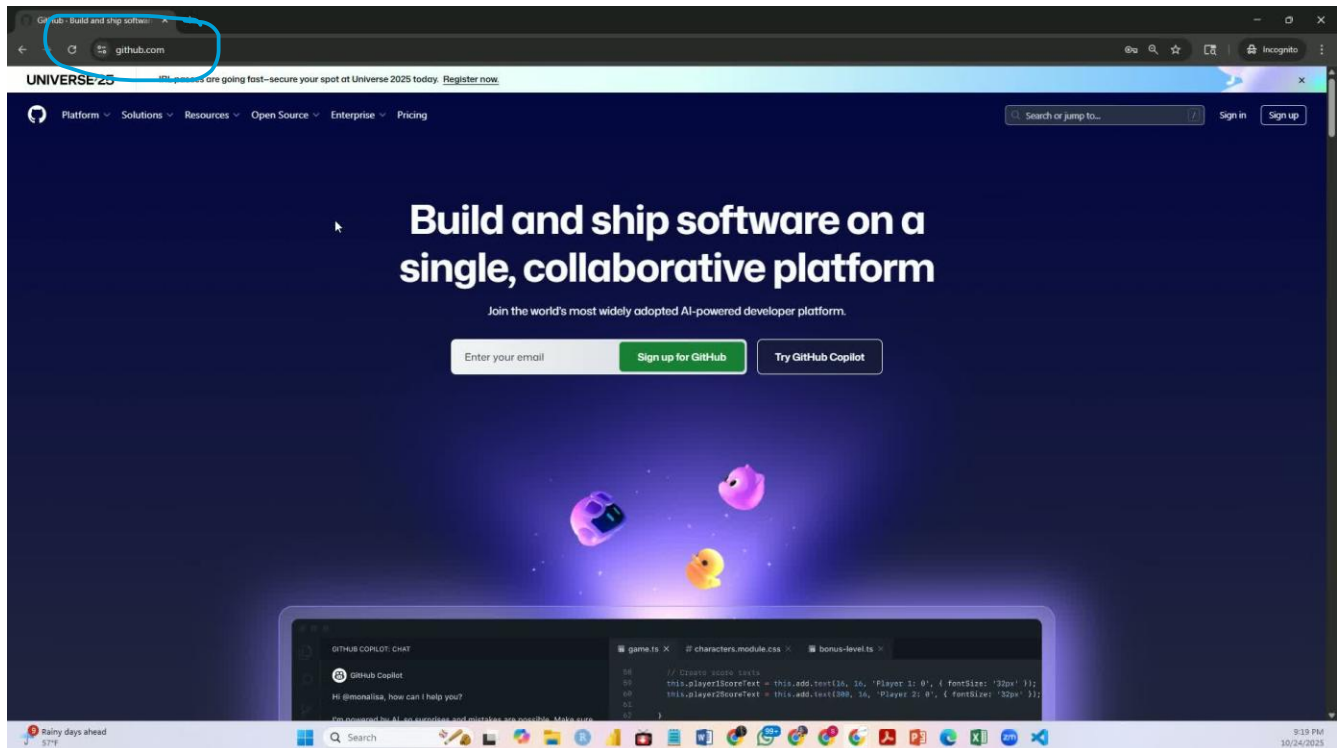

This SOP outlines the steps to create a GitHub account for team members, ensuring they can access and utilize the platform effectively.

Key Steps

Step 1: Update Your Browser

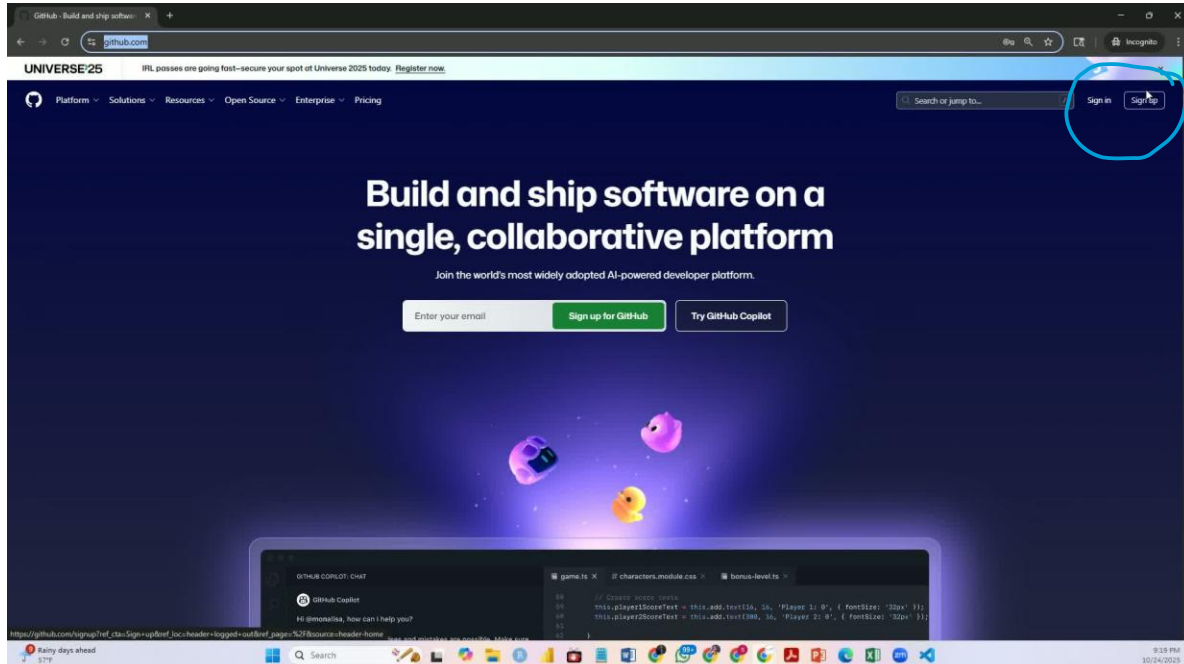

- Ensure your web browser is up to date to avoid compatibility issues.
- If necessary, check for updates in your browser settings.

Step 2: Navigate to GitHub

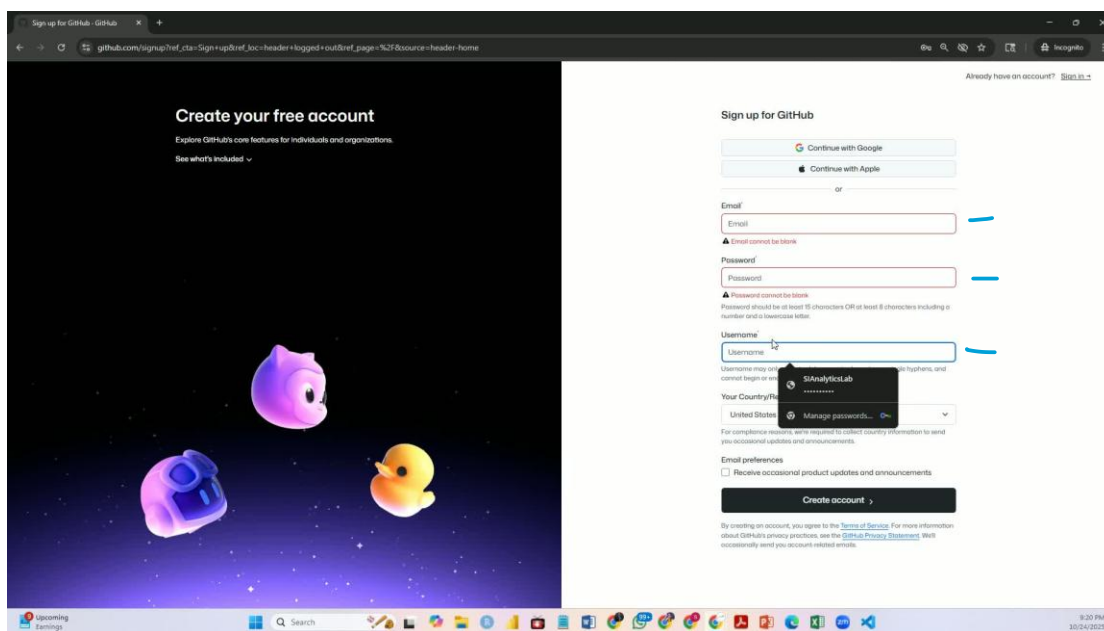

- Open your web browser.
- Type in the URL: <https://github.com/> and press Enter.

Step 3: Sign In or Create an Account

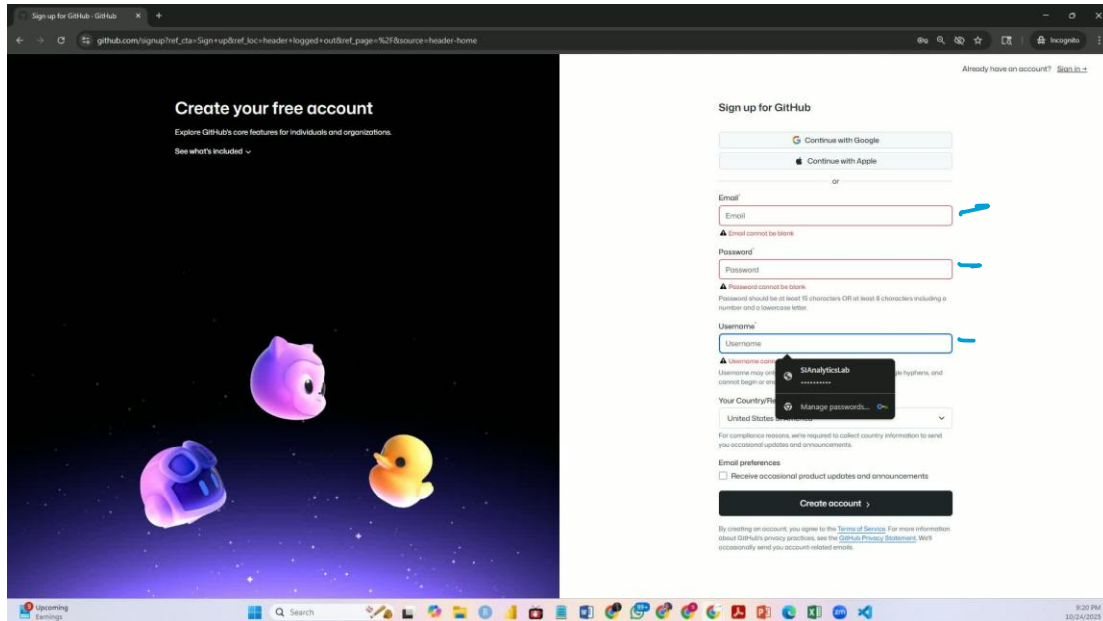

- If you already have an account, click on 'Sign In' and enter your credentials.
- If you do not have an account, click on 'Sign Up' to create a new account.

Step 4: Fill in Your Details 2:09

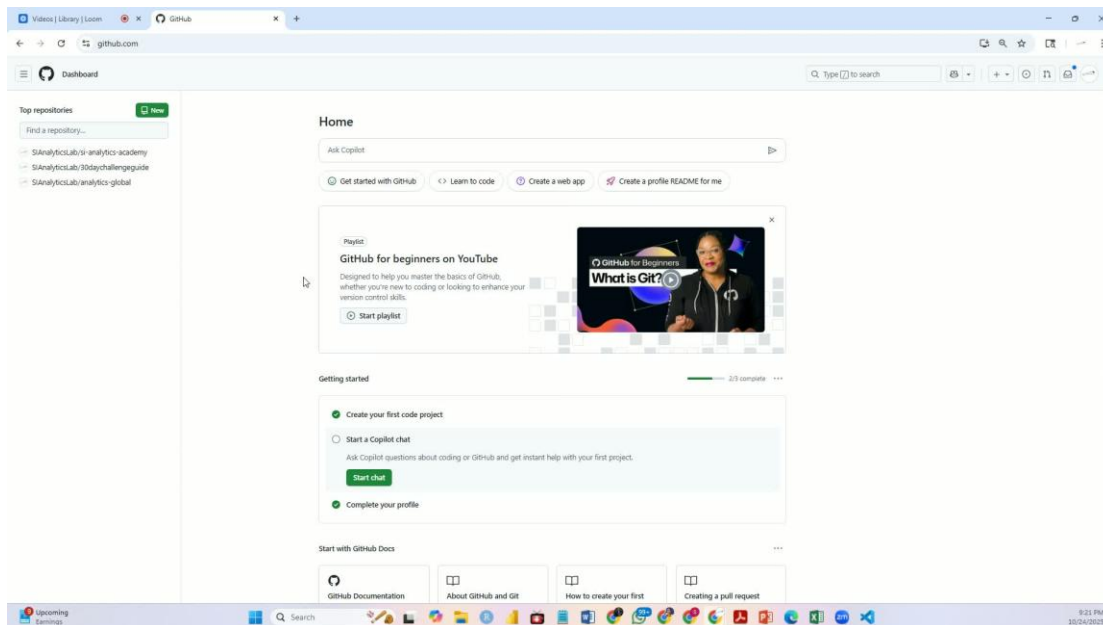

- Choose a username (e.g., 'camilasanchez' or 'tristanstewart').
- Enter your email address.
- Create a strong password.

Step 5: Verify Your Email

- Check your email inbox for a verification email from GitHub.
- Click on the verification link in the email to activate your account.

Step 6: Customize Your Profile

- Once logged in, navigate to your profile settings.
- Customize your profile to make it professional and reflective of your work.

Cautionary Notes

- Ensure that your *username is professional*, as it will be visible to others.
- Use a strong password to protect your account from unauthorized access.

Tips for Efficiency

- Bookmark **github.com** for quick access in the future.
- Regularly check for updates to your browser to ensure optimal performance.
